

Skyhigh Security Cloud Administration Course Description Datasheet

Course Overview

The Skyhigh Security Cloud Administration course provides in-depth training on Skyhigh Security Cloud and related cloud products. The course covers on configuration and administration of critical Skyhigh Security Cloud functions. It also walks through the components to help participants identify, define, and refine use cases based on specific scenarios. Products and capabilities covered in this course include the Skyhigh Security Cloud platform, Cloud Access Security Broker (CASB), Data Loss Prevention (DLP), Infrastructure as a Service (IAAS), Software as a Service (SAAS), Shadow IT, and Cloud Native Application Platform Protection (CNAPP).

Agenda At A Glance

Day 1

- Welcome
- Skyhigh Security Cloud Overview
- Skyhigh Security Cloud Interface
- Administration
- Cloud Connector
- Connecting Services

Day 3

- Analytics
- User Activity
- Threat Protection
- Shadow IT
- Anomalies
- Incidents

Day 2

- Classifying Data
- DLP Policies
- Data Loss Prevention for Email
- Cloud Access Protection

Day 4

- Configuration Audit
- On Demand Scans
- Dashboards and Reporting
- CNAPP and Container Security
- Advanced Topics

Audience

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with cloud asset security.

Recommended Pre-Work

- Knowledge of common cloud product administration including Microsoft Office 365, Amazon Web Services (AWS)
- Understanding of common security issues facing complex cloud environments including Shadow IT and Data Loss threats
- Knowledge of cloud infrastructure and service connection in order to connect cloud products

Example Course Objectives

Skyhigh Security Cloud Overview

Analyze key use cases and drivers for application of Skyhigh Security Cloud in a customer environment.

Skyhigh Security Cloud Interface

Perform configuration of a Saved View for use in a customer environment.

Administration

Evaluate critical infrastructure displays available in Skyhigh Security Cloud

Cloud Connector

Perform download and install of Skyhigh Security Cloud Connector

Connecting Services

Describe how Skyhigh Security Cloud integrates with Infrastructure-as-a-Service (IaaS).

Classifying Data

Define various data identifiers used in an Skyhigh Security Cloud environment.

Data Loss Prevention Policy

Create a basic Data Loss Prevention policy for use in a customer environment.

Data Loss Prevention for Email

Summarize the Data Loss Prevention capabilities of Skyhigh Security Cloud in cloud email applications.

Cloud Access Protection

Summarize the Cloud Access Protection capabilities of Skyhigh Security Cloud.

Analytics

Identify uses of Analytics in a customer environment

Example Course Objectives

User Activity

Identify key activity monitoring information available, including users, activities, activity categories, and anomalies.

Threat Protection

Identify potential threat protection issues that Skyhigh Security Cloud will address in a customer environment.

Shadow IT

Summarize the Skyhigh Security Cloud features for "Shadow IT."

Anomalies

Explain the role of Cloud Trust Registry in identifying the Cloud Service Provider's risk scores

Incidents

Configure Incident Management controls for use in a customer environment

Configuration Audit

Construct a configuration audit for a cloud environment.

On Demand Scans

Identify potential data breaches for data that is stored cross CSPs and various IaaS platforms

Dashboard and Reporting

Construct a Dashboard scheme, which would be useful to various job functions in Skyhigh Security Cloud.

CNAPP and Container Security

Analyze the impact of Cloud Native Application Platform Protection (CNAPP) on a customer security environment

Advanced Topics

Describe supported application programming interface (API) calls to gather data from Skyhigh Security Cloud.
