

VENDOR VISION 2026

PRESENTED BY **EMA**[™]

30
YEARS

Welcome to the 2026 RSAC edition of EMA's Vendor Vision!

The RSAC Conference remains the definitive gathering for cybersecurity professionals, serving as the primary stage for the industry's most significant breakthroughs. This year, the conversation moved beyond mere defense; it is about the rise of agentic AI, the necessity of preemptive security, and the evolution of dynamic authorization. With over 600 vendors flooding the Moscone Center, the challenge for any attendee is distinguishing true innovation from the marketing noise.

Vendor Vision is designed to solve that problem. To help you maximize your time, the EMA information security, risk, and compliance management team surveyed the exhibitor landscape and hand-selected 10 "must-see"

vendors. These organizations are not just participating in the market—they are defining its future. Whether they are securing autonomous AI workflows, future-proofing identity with quantum-resistant cryptography, or redefining data-aware edge security, these visionaries represent the absolute best the industry has to offer in 2026.

There are literally hundreds of excellent vendors to chat with while at the conference, but the EMA Vendor Vision inclusions are some of the best we have seen. We hope these brief summaries and recommendations help streamline the conference for you.

See you at the show!

Christopher Steffen, CISSP, CISA
VP of Research

Ken Buckler, CASP
Research Director

Skyhigh Security

Security Service Edge (SSE)

Solution Name(s): Skyhigh Security SSE (featuring DSPM & Enterprise Browser)

Skyhigh Security is dedicated to securing data with cloud native, data-aware solutions that empower organizations to collaborate freely. Its flagship security service edge (SSE) portfolio protects data use across hybrid environments. Skyhigh provides a unified framework securing data across web, cloud services, private applications, and endpoints. By delivering enterprise-grade threat protection and robust data controls, Skyhigh helps customers reduce risk and ensure regulatory compliance globally. Their mission is to redefine the digital perimeter, ensuring sensitive information remains protected regardless of where it resides or how it is accessed in today's interconnected landscape.

What Sets Them Apart

Skyhigh distinguishes itself with a "data-first" SSE platform that integrates edge security with deep data protection. While many focus on access controls, Skyhigh secures the entire lifecycle of how data is created, used, and shared. Their platform provides comprehensive visibility across diverse channels, including AI solutions and private applications. A key differentiator is the ability to reduce complexity while maintaining high-performance protection. By converging DLP with cloud native security, Skyhigh ensures safe collaboration. Recent advancements in data security posture management (DSPM) and an enterprise browser controls further disrupt industry norms.

One More Thing

At RSAC 2026, Skyhigh is disrupting industry norms by bridging the gap between legacy infrastructure and cloud native resilience. They are unveiling major updates to DSPM capabilities and a full-stack on-premises SSE solution. Skyhigh is also introducing critical AI security guardrails to ensure sensitive data is not leaked through generative AI platforms or autonomous agents.

EMA Perspective

Skyhigh Security stands out for organizations refusing to compromise on data integrity. Their convergence of edge security and robust DLP addresses the loss of control over data in motion. We are impressed with their "full-stack" flexibility, offering both cloud native and on-premises SSE options. For attendees, Skyhigh provides the necessary governance for enterprises safely adopting agentic AI workflows.

About Enterprise Management Associates, Inc.

Founded in 1996, Enterprise Management Associates (EMA) is a leading IT research and consulting firm dedicated to delivering actionable insights across the evolving technology landscape. Through independent research, market analysis, and vendor evaluations, we empower organizations to make well-informed technology decisions. Our team of analysts combines practical experience with a deep understanding of industry best practices and emerging vendor solutions to help clients achieve their strategic objectives. Learn more about EMA research, analysis, and consulting services at www.enterprisemanagement.com or follow EMA on [X](#) or [LinkedIn](#).
