

Skyhigh DSPM Risk Report

Customer XXXX – Reality Check Executive Summary

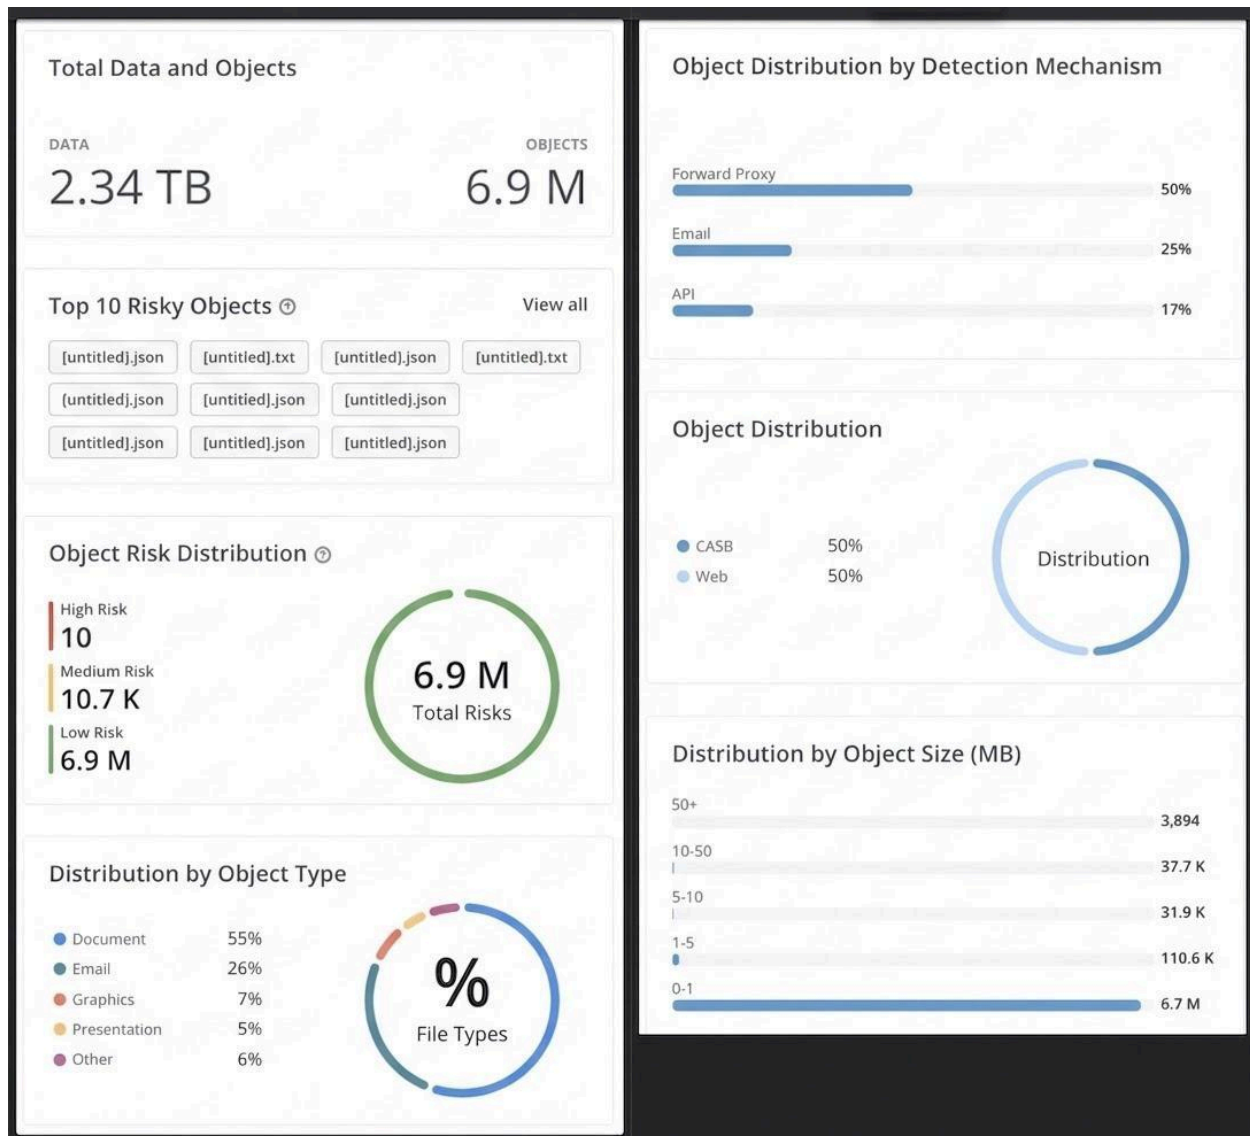

Date Scan Enabled	January 22 2026
Prepared By	CSM Name - XXXXX XXXXX
Scope	Initial DSPM Discovery Scan

Executive Summary

Modern data security requires moving beyond simple visibility to automated, multi-vector protection. During our initial discovery scan using Skyhigh's Data Security Posture Management (DSPM), we uncovered immediate, unmanaged data risks across your cloud estate. These risks, particularly which span across Shadow AI and sanctioned SaaS, often remain invisible until a breach occurs.

1. The Data Risk Landscape

Out of the limited capacity scanned, here is a high-level snapshot of your current exposure:

2. Shadow AI Blind Spot Analysis

Shadow AI Metric

Unauthorized AI Apps in Use

Findings

SERVICE	TOTAL DATA	USERS	OBJECT RISK ↓
 OpenAI - ChatGPT	4.4 GB	988	
 Google Gemini (for...	35.8 MB	103	
 DeepAI	6.1 MB	7	
 Black Crow AI	555.2 kB	14	
 QuillBot	802.9 kB	19	
 OpenClaw	12.6 kB	2	
 Google AI Studio	18.8 kB	2	
 PopAi	68.5 kB	2	
 Grok	3 MB	13	
 Napkin AI	4.5 kB	3
