

Skyhigh Security Cloud (SSC) Fundamentals

e-Learning (Self-Paced) Training

Audience

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with web protection.

Assessment

Complete the End of Course exam to evaluate the effectiveness of the course and download the Course Completion certificate from the [Skyhigh Academy Portal](#).

Course Overview

The **Skyhigh Security Cloud (SSC)** eLearning course is designed to introduce you to the concepts, user interface, and administration of SSC and associated products. Skyhigh Security products and capabilities explained in this course include the Skyhigh Security Cloud Platform, Cloud Access Security Broker (CASB), Data Loss Prevention (DLP), Infrastructure as a Service (IAAS), Software as a Service (SAAS), and Shadow IT. Each of these products and capabilities are integral to the Security Service Edge (SSE) product and security philosophy.

Course Content

Module 1: Cloud Overview

Module 2: Skyhigh Security Cloud Interface

Module 3: Administration

Module 4: Cloud Connector

Module 5: Connecting Services

Module 6: Data Classification

Module 7: Data Loss Prevention

Module 8: Cloud Access Protection

Module 9: Analytics

Module 10: User Activity

Module 11: Threat Protection and Shadow IT

Module 12: Anomalies

Module 13: Incidents

Module 14: Configuration Audit and On-Demand Scans

Module 15: Dashboard and Reporting

Module 16: CNAPP and Container Security

Module 17: Advanced Topics

Module 18: Conclusion

About Skyhigh Security

When your sensitive data spans the web, cloud applications, and infrastructure, it's time to rethink your approach to security. Imagine an integrated Security Service Edge solution that controls how data is used, shared, and created, no matter the source. Skyhigh Security empowers organizations to share data in the cloud with anyone, anywhere, from any device without worry. Discover Skyhigh Security, the industry-leading, data-aware cloud security platform.
